Respectfully,

EDWARD M. SMALL,
Acting Assistant Surgeon, U. S. M. H. S.

Arrival at Reedy Island Quarantine of vessels from Cuban ports.

REEDY ISLAND QUARANTINE, via Port Penn, Del., June 15, 1902.

SIR: Through the medical officer in command of national quarantine service on Delaware Bay and River, I have the honor to report the arrival at this station of the following vessels: June 10, steamship *Taff*, from Banes, with fruit; no passengers; bill of health signed by quarantine officer. June 11, steamship *Prosperare*, from Havana, with iron; no passengers; bill of health signed by Surgeon Glennan. June 14,

steamship *Bogstad*, from Santiago de Cuba, with iron ore; no passengers; bill of health signed by Acting Assistant Surgeon McDowell.

Respectfully, T. F. RICHARDSON,
Assistant Surgeon, U. S. M. H. S., In Command.

Arrival at Baltimore of vessels from Cuban and South American ports.

BALTIMORE, MD., June 21, 1902.

SIR: I have to report the arrival of the following vessels at this port for the week ended this day: Netherlands steamship *Callisto*, from Daiquiri, with ore; British steamship *Lustleigh*, from Tocopilla, with nitrate of soda; Norwegian steamship *Habil*, from Baracoa, with fruit; Norwegian steamship *Storfond*, from Daiquiri, with ore; American barkentine *Frances*, from Rio de Janeiro, with coffee; American bark *Amy*, from Rio de Janeiro, with coffee.

Respectfully, WM. F. STONE,
Collector.

REPORTS FROM THE MEXICAN BORDER.

El Paso, Tex., June 14, 1902—Inspection service.—I have the honor to transmit herewith summary of transactions at this station for the week ended June 14, 1902. Inspection Mexican Central Railroad passengers, 175; inspection Rio Grande and Pacific Railroad passengers, 18; inspection of Mexican immigrants, 180; disinfection of soiled linen imported for laundry, 498 pieces; vaccination of immigrant children, 10; inspection of a certificate of death of corpse contained in hermetically sealed coffin transported into the United States, 1.

E. ALEXANDER,
Acting Assistant Surgeon, U. S. M. H. S.

Laredo, Tex., June 11, 1902—Inspection service—Yellow fever at Vera Cruz and Tampico.—Referring to my telegram dated June 11, 1902, "Request authority to employ 1 person as temporary guard and disinfector," the following are reasons for the employment of 1 intelligent man: Increase of yellow fever at Vera Cruz, with probability of epidemic at that point. (See PUBLIC HEALTH REPORTS, also daily press.) Received letter from Assistant Surgeon Goldberger to day stating 1 case of yellow fever in lazaretto at Tampico, Mexico, taken from steamer from Vera Cruz. Smallpox prevails at a small town (Lampazos) 72 miles south of here on railroad entering at this port. Persons can arrive at this port from Vera Cruz in forty seven hours, leaving them over one hour in Mexico City to make connection, and in a little less time from Tampico. The rule of the 2 railroads running out of Vera Cruz to Mexico City is to paste labels on trunks that are checked, with date of departure. These labels are often the means of detecting exact date of a passenger leaving Vera Cruz. All baggage of persons leaving Mexico is examined by Mexican customs officers just before crossing border, and U. S. Marine-Hospital Service guard during this procedure can unofficially get track of Vera Cruz baggage, etc., and report upon arrival of train at United States inspection station. Baggage of immigrants from Saltillo and Lampazos, Mexico, will have to be disinfected on account of smallpox prevailing at those points. Saltillo has a population of about 30,000; distance from Laredo, 235 miles. No doubt there are a few other small places on railroad where smallpox prevails, but I only know of these points at present, within 300 miles of this port.

Laredo, Tex., June 14, 1902—Inspection service.—I have the honor to submit following report of inspection for week ended June 14, 1902: Number of trains entering from Mexico inspected, 15 (1 special with railroad workmen); persons on trains entering from Mexico inspected and passed, 978; immigrants inspected, 25; immigrants vaccinated, 7; certificates of corpse within hermetically sealed coffin inspected. June 12, 4 persons, two days out from Tampico, detained. June 13, 3 bundles of immigrant baggage disinfected.

H. J. HAMILTON,
Acting Assistant Surgeon, U. S. M. H. S.

Statistical reports of States and cities of the United States—Yearly and monthly.

CALIFORNIA—Los Angeles.—Month of May, 1902. Estimated population, 120,000. Total number of deaths, 182, including diphtheria, 2; enteric fever, 3; measles, 1, and 25 from tuberculosis.

FOREIGN AND INSULAR.

BRAZIL.

Report from Bahia.

BAHIA, BRAZIL, May 26, 1902.

SIR: I beg leave to report that for the week ended May 24, 1902, there were reported 108 deaths in Bahia. The following were the chief causes of death: Arterio sclerosis, 7; beriberi, 2; bronchitis, 5; diarrhea and dysentery, 2; eclampsia, 1; erysipelas, 1; enteritis, 3; malarial fever, 4; typhoid fever, 1; gangrene, 1; gastritis, 12; Bright's disease, 1; nephritis, 1; stillborn, 7; pneumonia, 1; syphilis, 1; tetanus, 7; tuberculosis, 7, and from other causes, 43.

Respectfully,

H. W. FURNISS,
United States Consul.

The SECRETARY OF THE TREASURY.

BRITISH HONDURAS.

Weekly report of conditions and transactions at Belize—Fruit port.

BELIZE, BRITISH HONDURAS, June 8, 1902.

SIR: I have the honor to make the following report of the conditions and transactions at this port during the week ended June 7, 1902:

Population according to census of 1901, 9,113; present officially estimated population, about 7,000. Number of cases and deaths from yellow fever during the week, none; number of cases and deaths from smallpox during the week, none; number of cases and deaths from typhus fever during the week, none; number of cases and deaths from cholera during the week, none; number of cases and deaths from plague during the week, none; number of deaths from other causes during the week, none. General sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following vessels: June 5, steamship *Managua*, crew, 16; passengers from this port, 10; passengers in transit, none; baggage disinfected, 24 pieces. June 6, steamship *Breakwater*, crew, 34; passengers from this port, 3; passengers in transit, 7; baggage disinfected, 7 pieces.

Respectfully,

R. H. PETERS,
Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL, *U. S. Marine-Hospital Service.*

CANADA.

Inspection of immigrants at Quebec and Halifax for the week ended June 14, 1902.

QUEBEC, CANADA, June 16, 1902.

SIR: I have the honor to report that for the week ended June 14 there were inspected 684 immigrants; passed, 660; detained, 24.

Respectfully,

VICTOR G. HEISER,
Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL, *U. S. Marine-Hospital Service.*

QUEBEC, CANADA, June 19, 1902.

SIR: I have the honor to report that for the week ended June 14 there were inspected at the port of Halifax, Nova Scotia, 205 immigrants; passed, 197; detained, 8.

Respectfully,

VICTOR G. HEISER,
Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

Origin of smallpox outbreak at Dartmouth, Nova Scotia.

QUEBEC, CANADA, June 19, 1902.

SIR: I have the honor to inclose a letter received from Dr. N. E. Mackay, quarantine officer at the port of Halifax, Nova Scotia. The letter is a reply to a report on the smallpox situation at Halifax, published in the PUBLIC HEALTH REPORTS dated April 4, 1902.

Respectfully,

VICTOR G. HEISER,
Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

[Inclosure.]

HALIFAX, NOVA SCOTIA, June 16, 1902.

SIR: The facts in connection with the outbreak of smallpox in Dartmouth are as follows:

Mr. Walker, the man who took ill first with the disease, and who was supposed to have contracted it from the steamship *Dahome*, worked on the boiler of that vessel on February 18 and February 19, and on February 23 he took ill. Dr. Milson was called in for the first time on February 24, and the patient was out on February 27.

By this you will see that the man Walker took ill on the fifth day after he began to work on the vessel, which would allow of an incubation period of five days (if he had contracted the disease from the vessel), a thing unheard of.

I may further state that the steamship was thoroughly overhauled and refitted immediately after she was released from quarantine and none of the working men contracted smallpox, and further, she has made 2 trips to the West Indies and had a large passenger list each time, and none of them or any of the crew developed the disease.

Respectfully,

N. E. MACKAY,
Quarantine Officer.

VICTOR G. HEISER,
Assistant Surgeon, U. S. M. H. S.

CHINA.

Report from Hongkong—Plague and cholera.

HONGKONG, CHINA, May 21, 1902.

SIR: I have the honor to transmit herewith the abstract of bills of health issued at this station during the week ended May 17, 1902. Seven vessels were disinfected, 476 individuals were bathed at the disinfecting station, and 579 bundles of clothing and bedding were disinfected by steam.

The cholera situation remains about the same, 39 cases and 36 deaths having been reported during the week. The cases were distributed among the various nationalities, as follows: Five Indians, 1 Portuguese, 1 Japanese, 1 German, and 31 Chinese. The total cholera cases and deaths thus far this year are, therefore, 254 and 227, respectively.

There was a slight increase in the number of cases and deaths due to bubonic plague, 31 cases and 34 deaths having been reported. All were

Chinese except 1, a sailor from the Japanese steamship *Kagashima Maru*. One case of smallpox was imported into the colony by the U. S. S. *Vicksburg*. One case of diphtheria and 1 case of enteric fever were also reported during the week.

A letter was received during the week from Dr. Anna K. Scott, of the American Baptist Mission at Swatow, stating that cholera has been epidemic at Swatow and surrounding villages, but that since the beginning of the rainy season there has been some improvement.

It was definitely determined during the week that the Sek Ke district has also been visited by an epidemic of cholera, and that for the past three months plague has been very severe. This district is about 40 miles northwest of Macao, on a tributary of the West River. Practically all the potatoes in the market come from this district during the early spring months.

Respectfully,

JOHN W. KERR,
Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

Cholera at Tientsin.

DEPARTMENT OF STATE,
Washington, D. C., June 14, 1902.

SIR: I have the honor to advise you, for the information of the U. S. Marine-Hospital Service, that the Department is in receipt of a telegram from the consul at Tientsin, which reads as follows: "Cholera here."

Respectfully,

JOHN HAY,
Secretary of State.

The SECRETARY OF THE TREASURY.

Cholera increasing in Shanghai.

DEPARTMENT OF STATE,
Washington, D. C., June 18, 1902.

SIR: For the information of the U. S. Marine-Hospital Service, I have the honor to advise you that the Department is in receipt of a telegram from the consul-general of the United States at Shanghai, China, under date of the 17th instant which reads: "Cholera increasing here. About 30 foreign cases. Unknown, but large number natives dying daily."

Respectfully,

JOHN HAY,
Secretary of State.

The SECRETARY OF THE TREASURY.

COLOMBIA.

Weekly report of conditions and transactions at Bocas del Toro—Fruit port.

BOCAS DEL TORO, COLOMBIA, June 10, 1902.

SIR: I have the honor to make the following report of the conditions and transactions at this port during the week ended June 9, 1902:

Population according to census, not obtainable. Number of cases and deaths from yellow fever during the week, none; number of cases and deaths from smallpox during the week, none; number of cases and deaths from typhus fever during the week, none; number of cases and deaths from cholera during the week, none; number of cases and deaths from plague during the week, none; number of deaths from

other causes during the week, 2. Prevailing diseases, malarial. One death was suicide by drowning ; 1, hemiplegia. General sanitary condition of this port and the surrounding country during the week, good. There has been a slight increase of intermittent malarial fever. I am informed by the physician attending the government troops at this place that there is no increase in the percentage of sick ones under his care ; however, there is no suspicion of any contagious or infectious diseases.

Bills of health were issued to the following vessels: June 4, steamship *Mount Vernon*, crew, 20 ; passengers from this port, none ; passengers in transit, none ; baggage disinfected, none ; steamship *Hispania*, crew, 22 ; passengers from this port, none ; passengers in transit, none ; baggage disinfected, none. June 7, steamship *Alabama*, crew, 19 ; passengers from this port, none ; passengers in transit, none ; baggage disinfected, none.

Respectfully,

PAUL OSTERHOUT,

Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL, U. S. Marine-Hospital Service.

COSTA RICA.

Weekly report of conditions and transactions at Port Limon—Fruit port.

PORT LIMON, COSTA RICA, June 12, 1902.

SIR: I have the honor to make the following report of the conditions and transactions at this port during the week ended June 12, 1902:

Present officially estimated population, 4,000. Number of cases and deaths from yellow fever during the week, 1 case, no deaths ; number of cases and deaths from smallpox during the week, none ; number of cases and deaths from typhus fever during the week, none ; number of cases and deaths from cholera during the week, none ; number of cases and deaths from plague during the week, none ; number of deaths from other causes during the week, 3. Prevailing diseases, yellow fever and malarial fever. General sanitary condition of this port and the surrounding country during the week, not good. The 3 deaths noted above, namely, an adult colored male, due to dysentery, died in hospital here ; an infant colored female, from pernicious (malarial) fever, and an infant Chinese male, due to intermittent (malarial) fever. I have reliable information as to the existence of yellow fever at points between La Junta and Guapiles, respectively, 38 and 50 miles from here, on the Guapiles branch of the Costa Rica Railway.

Bills of health were issued to the following vessels: June 5, steamship *Spero*, crew, 19 ; passengers from this port, none ; passengers in transit, none ; baggage disinfected, none ; steamship *Beverly*, crew, 39 ; passengers from this port, none ; passengers in transit, none ; baggage disinfected, none. June 6 steamship *Olympia*, crew, 37 ; passengers from this port, none ; passengers in transit, none ; baggage disinfected, none. June 7, steamship *Taunton*, crew, 23 ; passengers from this port, none ; passengers in transit, none ; baggage disinfected, none. June 8, steamship *Montevideo*, crew, 116 ; passengers from this port, 36 ; passengers in transit, 46 ; baggage disinfected, none ; steamship *Kitty*, crew, 21 ; passengers from this port, none ; passengers in transit, none ; baggage disinfected, none. June 9, steamship *Athos*, crew, 42 ; passengers from this port, 4 ; passengers in transit, 20 ; baggage disinfected, none.

Respectfully,

W. H. CARSON,

Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL, U. S. Marine-Hospital Service.

CUBA.

Report from Cienfuegos.

CIENFUEGOS, CUBA, June 16, 1902.

SIR: I have the honor to report that during the week ended June 14, 1902, 5 bills of health were issued to vessels leaving this port for the United States and its outlying territories. One vessel was disinfected and the corresponding certificate issued. The case of yellow fever previously reported was discharged, cured, June 14, 1902.

Respectfully,

G. M. GUITÉRAS.

Passed Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

Reports from Havana—Quarantine restrictions reimposed—Yellow fever on vessels from Vera Cruz.

HAVANA, CUBA, June 11, 1902.

SIR: I have the honor to make the following report of the transactions of this station for the week ended June 7, 1902:

In accordance with your directions, quarantine restrictions were reimposed from the 1st of the month. The crew of the Peninsular and Occidental steamship *Martinique* were examined and furnished with certificates of immunity. This vessel plies 5 times weekly between Havana and Key West, carrying mail, certain classes of freight, and immune passengers only.

No cases of yellow fever have been reported upon the island, and the Cuban quarantine service is maintaining restrictions against the introduction of infection from foreign ports. A case of yellow fever in a cattleman from Vera Cruz was removed from the steamship *Esperanza* and isolated; also a case of yellow fever was detected upon an arriving vessel from Vera Cruz, in the harbor of Cienfuegos, and properly isolated.

The immunity of the crews of certain cattle vessels arriving from Florida has been investigated and certificates issued.

At a recent meeting of President Estrada Palma and his cabinet, it was decided that the Cuban maritime quarantine service should be transferred from the secretary of finance to the office of the secretary of state; also that the period of detention of nonimmune passengers arriving from Mexican ports, infected with yellow fever, should be five days from time of arrival in Havana harbor. These passengers are detained at the Tricornia camp.

The cabinet also decided to make request of the United States that its medical officers stationed in the West Indies, Mexican, Central, and South American ports be directed to issue bills of health to vessels coming to Cuba, and to issue certificates of immunity to yellow fever and that passengers and crews have been vaccinated.

In a pleasant interview with President Palma, I gave assurances of the aid of the U. S. Marine-Hospital Service in these matters, because the protection of the island of Cuba from the introduction of yellow fever and other quarantinable diseases is also the protection of the United States, on account of the geographical and commercial relations

of the two countries. The requests to the above-mentioned matter will reach you through official diplomatic channels.

I inclose the usual statistics for the week.

Respectfully,

A. H. GLENNAN,
Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

Report from Nuevitas.

NUEVITAS, CUBA, June 9, 1902.

SIR: Through the chief quarantine officer for the island of Cuba, I have the honor to submit herewith the abstract bills of health issued at this port during the week ended June 7, 1902. During the week 3 vessels bound for ports in the United States were inspected and issued bills of health. The health of this port and town is good, the mortuary statistics reporting no death for the week. The weather begins to be very warm, with occasional rains.

Throughout the third quarantine district of the island general good health prevails, the sanitary condition being good, with no report of any quarantinable disease for the week.

Respectfully,

E. F. McCONNELL,
Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

Concerning summary of work of inspection service at Santiago de Cuba—
Mortuary statistics.

SANTIAGO DE CUBA, June 9, 1902.

SIR: Through Surgeon Glennan, Havana, I have the honor to inclose herewith a summary of the work at this port from May 20 to May 31, inclusive. Also the mortuary statistics for this period.

Respectfully,

ALEXANDER B. McDOWELL,
Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

ENGLAND.

Report from London.

LONDON, ENGLAND, June 4, 1902.

SIR: I have the honor to report, for the week ended May 31, 1902, there were 10 vessels inspected. It was necessary to vaccinate 156 of the crew and cattle-men of the vessels. During the week ended May 24, 1902, there were 55 deaths from smallpox and 1,344 cases remained under treatment. The number of fresh cases notified during this week were between 20 and 30 daily.

Respectfully,

SYLVESTER WILLARD,
Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

Report from Liverpool.

LIVERPOOL, ENGLAND, June 10, 1902.

SIR: I have the honor to state that for the week ended June 7, 1902, there were reported to the local health authorities the following cases: Smallpox, 2; typhus fever, 4; enteric fever, 18; scarlet fever, 133;

diphtheria, 19; measles, 94, and whooping cough, 74. For the same period there were reported from Birkenhead the following cases: Small-pox, 2; scarlet fever, 4; diphtheria, 2; enteric fever, 3; continued fever, 1, and measles, 7.

Respectfully,

CARROLL FOX,

Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

GERMANY.

Report from Berlin—Plague and cholera in various countries.

BERLIN, GERMANY, June 7, 1902.

SIR: I have the honor to transmit the latest information obtained from the imperial health office (Kaiserlichen-Gesundheitsamt) in Berlin, regarding plague and cholera:

Plague.

BRITISH EAST INDIA.—On April 18, a case of plague was officially recorded in Rangoon. The patient had arrived by steamship from Calcutta. In the Bombay Presidency there were registered during the week ended May 9, 1,295 plague cases and 1,096 deaths, of which 417 (391) occurred in the city of Bombay and 144 (122) in the town and port of Karachi.

CHINA—*Hongkong.*—Between March 30 and April 19, 9 Chinese and 3 Portuguese were registered as suffering with plague. Of the 12 reported cases 11 ended in death.

JAPAN.—On April 3, the plague patient who had arrived from Formosa on March 7, died in Nagasaki.

CAPE COLONY.—During the week ended May 3, neither new plague cases nor deaths were officially recorded. On May 3, as on April 26, there were still 6 plague patients under treatment, 5 Europeans and 1 native, all in Port Elizabeth.

NEW SOUTH WALES.—Up to April 20, since the fresh outbreak of plague, 100 plague cases have been officially recorded, of which 26 ended in death and 37 have recovered. On April 21 there were still 37 plague patients under treatment.

QUEENSLAND.—According to the official bulletins, there occurred during the period from March 30 to April 12, 9 plague cases and 5 deaths. Of the 42 cases recorded in the colony up to April 12, 40 occurred in Brisbane and 1 each in Rosewood and Townville. During the week ended April 19, 4 fresh plague cases and 1 death were registered in Brisbane.

Plague and cholera.

BRITISH INDIA.—In Calcutta during the week from April 13 to April 19 (April 20 to April 26), 588 (577) persons died of plague, and 153 (146) died of cholera.

Respectfully,

FRANK H. MASON,
United States Consul-General.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

German vaccination law.

BERLIN, GERMANY, June 7, 1902.

SIR: I have the honor to transmit herewith a translation of the German vaccination law, which may be of interest in view of the fact that smallpox epidemics are now almost unknown in Germany, and even isolated cases are becoming events of rare occurrence.

The German authorities decided years ago that optional vaccination is ineffective, and universal vaccination is therefore enforced throughout the Empire. It has also been demonstrated that a single vaccination in infancy will not with certainty prevent the outbreak of epidemics of smallpox, and a strict system of revaccination has been established for children attending schools.

The statute provides that in the event of the occurrence of smallpox epidemics the existing regulations in the individual states regarding compulsory vaccination shall continue in force.

Respectfully,

FRANK H. MASON,
United States Consul-General.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

[Translation—Inclosure.]

1. (a) Every child must be vaccinated before the termination of the second year after birth, unless the parents can produce a medical certificate to the effect that the child has suffered with natural smallpox.

(b) Every pupil of a public educational establishment or private school (excepting Sunday and evening schools) must be vaccinated within the year in which the twelfth year of life is attained, unless a medical certificate can be produced showing that the pupil has survived an attack of smallpox, or has been vaccinated during the five previous years.

2. Every infant that can not be vaccinated without danger to health, shall undergo vaccination within the year following the cessation of the condition involving this danger.

3. If a vaccinator declares a vaccination to be unsuccessful, it must be repeated, at latest during the following year.

4. If vaccination has been postponed without valid excuse, it must be carried out within a period to be determined by the authorities.

5. Every infant must be brought before the vaccinator for inspection not before the sixth day and not later than the eighth day after vaccination.

6. Districts for vaccination shall be constituted in each federal state, and for each of such districts a public vaccinator shall be nominated.

During the period from the beginning of May to the end of September, the public vaccinator shall vaccinate all children in the district gratis, at appointed times and places.

7. A list of children to be vaccinated must be prepared by the authorities in each vaccination district, before the yearly vaccination period begins.

Chiefs of schools must furnish lists of pupils to be vaccinated or revaccinated.

In the lists the public vaccinator shall declare whether the vaccination has been successful or not, and whether it has been temporarily deferred, and if so, why.

The lists shall be forwarded to the authorities at the end of each calendar year.

The federal council shall determine as to the arrangement and wording of the lists.

8. Medical men only may perform vaccination. Such as are not public vaccinators must fill up the lists in the same manner as public vaccinators, and shall transmit the list to the authorities at the end of the year.

9. The several states will, under the direction of the federal council, establish a sufficient number of institutes for the obtaining and distribution of vaccine lymph.

These establishments shall furnish lymph gratis to public vaccinators.

Public vaccinators must furnish lymph, on demand, to other medical men gratis.

10. The vaccinator shall furnish a certificate after each vaccination and inspection.

11. The form of such certificate shall be decided upon by the federal council. The certificates shall be furnished gratis the first time.

12. Parents and guardians must, when so required, produce proof that the children in their care have been vaccinated, or that vaccination has been legally postponed.

13. The chiefs of schools, with pupils under legal compulsion to undergo vaccination, must find out, by demanding the above-mentioned certificates, whether legal vaccination has been carried out.

They must see to it that pupils becoming legally due for vaccination comply with this obligation.

They must furnish to the authorities, one month before the termination of the school year, a list of those pupils who have not the requisite certificates.

14. Parents and guardians who neglect to obtain the above-mentioned certificate shall be liable to a fine not exceeding 20 marks (\$5).

Parents and guardians whose children have been kept from vaccination or inspection shall be liable to a fine of 50 marks or three days' imprisonment.

15. Chiefs of schools and medical men who neglect to comply with the obligations specified in sections 7, 8, and 13, shall be liable to fines not exceeding 100 marks.

16. Any unqualified person who performs vaccination shall be liable to a fine of 150 marks or fourteen days' imprisonment.

17. Any vaccinator guilty of negligence in performing vaccination shall be liable to a fine of 500 marks or three months' imprisonment.

GUATEMALA.

Reports from Puerto Barrios.

PUERTO BARRIOS, GUATEMALA, June 9, 1902.

SIR: The health conditions of this port and the surrounding country have been good during the week ended June 7, 1902. The following steamships have cleared for the United States: June 3, American steamship *Breakwater*, for New Orleans, with passengers; Norwegian steamship *Managua*, for Mobile, with cargo of coffee and fruit.

Respectfully,

D. P. ALBERS,

*Resident Medical Inspector for the
Louisiana State Board of Health at Puerto Barrios.*

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

HAWAIIAN ISLANDS.

Report of quarantine transactions at Honolulu during the week ended May 31, 1902.

HONOLULU, H. I., June 6, 1902.

SIR: I have the honor to make the following report of outgoing quarantine transactions at this port for the week ended May 31, 1902: Steamships inspected and passed, 4; sailing vessels inspected and passed, 5; cabin passengers inspected and passed, 123; steerage passengers inspected and passed, 126; crews inspected and passed, 102; baggage disinfected, 167 pieces; sailing vessels disinfected, 7.

Respectfully,

L. E. COFER,

*Passed Assistant Surgeon, U. S. M. H. S.,
Chief Quarantine Officer, Hawaii.*

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

Removal of outgoing quarantine restrictions.

HONOLULU, H. I., June 12, 1902.

SIR: I have the honor to inform you that the outgoing quarantine restrictions have been removed this day, thirty days having elapsed

since the last case of plague was reported in Honolulu. I have notified all the quarantine officers on the Pacific coast.

Respectfully,

L. E. COFER,
Passed Assistant Surgeon, U. S. M. H. S.,
Chief Quarantine Officer, Hawaii.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

Report of immigrants inspected at the port of Honolulu, H. I., during the month of May, 1902.

Total number of immigrants inspected, 948; number passed, 947; number certified for deportation on account of dangerous contagious or loathsome diseases, or for other physical causes, 1.

L. E. COFER,

Passed Assistant Surgeon, U. S. M. H. S.,
Chief Quarantine Officer, Hawaii.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

HONDURAS.

Weekly report of conditions and transactions at La Ceiba—Fruit port.

LA CEIBA, HONDURAS, June 7, 1902.

SIR: I have the honor to make the following report of the conditions and transactions at this port during the week ended June 7, 1902:

Present officially estimated population, about 4,000. Number of cases and deaths from yellow fever during the week, none; number of cases and deaths from smallpox during the week, none; number of cases and deaths from typhus fever during the week, none; number of cases and deaths from cholera during the week, none; number of cases and deaths from plague during the week, none; number of deaths from other causes during the week, 1. Prevailing disease, malaria. General sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following vessels: June 4, steamship *Gwent*, crew, 15; passengers from this port, none; passengers in transit, none; baggage disinfected, none. June 5, schooner *Peerless*, crew, 8; passengers from this port, none; passengers in transit, none; baggage disinfected, none; steamship *Foxhall*, crew, 25; passengers from this port, none; passengers in transit, none; baggage disinfected, none. June 6, steamship *David*, crew, 23; passengers from this port, none; passengers in transit, none; baggage disinfected, none.

Respectfully,

W. B. ROBERTSON,

Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

Weekly report of conditions and transactions at Puerto Cortez—Fruit port.

PUERTO CORTEZ, HONDURAS, June 11, 1902.

SIR: I have the honor to make the following report of the conditions and transactions at this port during the week ended June 11, 1902:

Population according to census of 1896, 1,856. Present officially estimated population, 2,000. Number of cases and deaths from yellow

fever during the week, none ; number of cases and deaths from smallpox during the week, none ; number of cases and deaths from typhus fever during the week, none ; number of cases and deaths from cholera during the week, none ; number of cases and deaths from plague during the week, none ; number of cases from other causes during the week, 1. Prevailing disease, malarial fever. General sanitary condition of this port and the surrounding country during the week, very good.

Bills of health were issued to the following vessels: June 5, steamship *Breakwater*, crew, 34; passengers from this port, 4; passengers in transit, 6; baggage disinfected, 4 pieces. June 6, steamship *Bratten*, crew, 25; passengers from this port, none; passengers in transit, none; baggage disinfected, none. June 9, steamship *España*, crew, 14; passengers from this port, none; passengers in transit, 4; baggage disinfected, none.

Respectfully,

S. H. BACKUS,

Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine Hospital Service.

ITALY.

Report from Naples—Plague in Egypt and Madagascar—Smallpox in Italy.

NAPLES, ITALY, June 2, 1902.

SIR: I have the honor to report that for the week ended May 31, 1902, the following ships were inspected at Naples:

May 26, the steamship *Trojan Prince*, of the Prince Line, bound with passengers and cargo for New York. There were inspected and passed 414 steerage passengers and 61 pieces of large baggage; 600 pieces of baggage were disinfected by steam. The rejection of 23 steerage passengers was advised.

May 27, the steamship *Patria*, of the Fabre Line, bound with passengers and cargo for New York. There were inspected and passed 1,114 steerage passengers and 225 pieces of large baggage; 1,100 pieces of baggage were disinfected by steam. The rejection of 68 steerage passengers was advised.

May 28, the steamship *Sardegna*, of the Italian General Navigation Company, bound with passengers and cargo for New York. There were inspected and passed 1,226 steerage passengers and 141 pieces of large baggage; 1,300 pieces of baggage were disinfected by steam. The rejection of 81 steerage passengers was advised.

May 29, the steamship *Lahn*, of the North German Lloyd Steamship Company, bound with passengers and cargo for New York. There were inspected and passed 783 steerage passengers and 135 pieces of large baggage; 900 pieces of baggage were disinfected by steam. The rejection of 28 steerage passengers was advised.

May 30, the steamship *Victoria*, of the Anchor Line, bound with passengers and cargo for New York. There were inspected and passed 1,046 steerage passengers and 143 pieces of large baggage; 1,100 pieces of baggage were disinfected by steam. The rejection of 36 steerage passengers was advised.

Inspection at Palermo.

At Palermo for the week ended May 31, 1902, the following ship was inspected:

May 27 and May 28, the steamship *Trojan Prince*, of the Prince Line,

bound with passengers and cargo for New York. There were inspected and passed 315 steerage passengers; 396 pieces of baggage were disinfected by steam. The rejection of 38 steerage passengers was advised.

Public health of Naples.

The local official hygienic report states that the epidemic of smallpox at Naples has entirely ceased. In this report it is recorded that, while in the first four months of the year 1901, there were 176 deaths at Naples from smallpox, in the corresponding period of the present year there have been only 23 deaths, namely, 12 in January, 5 in February, 5 in March, and 1 in April. Smallpox is, however, still prevalent in many sections of southern Italy and the island of Sicily, regions from which emigrants come. For this reason, vaccination of emigrants before embarking, which is also required by the municipal ruling, is still practised.

Plague in Egypt.

Under date of May 28, 1902, it is reported that during the past week there were 9 cases of bubonic plague at Alexandria, with 7 deaths.

Plague in Madagascar.

A note published by the French colonial office states that there are 8 cases of bubonic plague at Mojanga, Madagascar. Since May 19, 1902, there have been 4 deaths from the disease. Mojanga is officially declared infected and the Government has instituted proper quarantine measures in neighboring ports.

Respectfully,

J. M. EAGER,

Passed Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

NAPLES, ITALY, June 9, 1902.

SIR: I have the honor to report that for the week ended June 7, 1902, the following steamships were inspected at Naples:

June 4, the steamship *Phœnicia*, of the Hamburg-American Line, bound with passengers and cargo for New York. There were inspected and passed 1,688 steerage passengers and 344 pieces of large baggage; 2,500 pieces of baggage were disinfected by steam. The rejection of 64 steerage passengers was advised.

June 4, the steamship *Citta di Torino*, of the Veloce Line, bound with passengers and cargo for New York. There were inspected and passed 790 steerage passengers and 160 pieces of large baggage; 950 pieces of baggage were disinfected by steam. The rejection of 29 steerage passengers was advised.

June 5, the steamship *Trave*, of the North German Lloyd Steamship Company, bound with passengers and cargo for New York. There were inspected and passed 877 steerage passengers and 145 pieces of large baggage; 900 pieces of baggage were disinfected by steam. The rejection of 41 steerage passengers was advised.

Smallpox at Naples.

During the fortnight ended June 7, 1902, there were officially reported at Naples 8 cases of smallpox with no deaths.

Respectfully,

J. M. EAGER,

Passed Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

JAPAN.

Reports from Yokohama—Fatal case of plague at Nagasaki, imported from Formosa.

YOKOHAMA, JAPAN, May 26, 1902.

SIR: I have the honor to transmit herewith abstract of bills of health issued at this office during the week ended May 24. Six bills of health were granted; 410 crew and 404 steerage passengers were inspected and passed; 77 steerage passengers were bathed, and 150 pieces of baggage were disinfected by formaldehyd. The port of Yokohama remains exempt from smallpox, cholera, and plague; 7 cases of enteric fever with no deaths and 2 cases of diphtheria with 1 death were officially reported during the past week.

Thanks to efficient quarantine measures, the Empire, excluding Formosa, may still be regarded as practically free from cholera and plague, though constantly menaced by invasion from the above island as well as Hongkong and Manila. On the 13th instant a pest death occurred at Nagasaki. The infection was contracted in Formosa and the circumstances as reported encourage the hope that no further cases will develop from this focus. The fragmentary reports available from Formosa show that plague still flourishes there. For example, as perhaps indicating the daily average, on the 22d instant a total of 17 new cases with 7 deaths was reported from various localities on that island; 12 of the new cases and 4 of the deaths occurred at Taipah. It is reported that the Russian cruiser *Razboynik* entered Keelung (Formosa) on May 20, with 9 cases of cholera on board, 1 of which had proven fatal.

Respectfully,

DUNLOP MOORE,

Assistant Surgeon, U. S. M. H. S.

The SURGEON GENERAL,
U. S. Marine-Hospital Service.

YOKOHAMA, JAPAN, June 2, 1902.

SIR: I have the honor to transmit herewith abstract of bills of health issued during the week ended May 31, 1902. Three bills of health were issued to vessels carrying 312 crew and 791 passengers; 411 steerage passengers were bathed, and 465 pieces of steerage baggage were disinfected by formaldehyd. During the past week there occurred in Yokohama 3 cases of enteric fever with 1 death.

The health of the Empire, Formosa excepted, continues satisfactory as regards quarantinable diseases.

Respectfully,

DUNLOP MOORE,

Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

Cholera at Karatsu.

NAGASAKI, June 23, 1902.

The SECRETARY OF STATE, Washington, D. C.:—Cholera Karatsu, coal exporting port.—HARRIS, United States Consul.

MEXICO.

Report from Vera Cruz—Inadequacy of water supply.

VERA CRUZ, MEXICO, June 15, 1902.

SIR: I have the honor to make the following report for the week ended June 14:

From yellow fever there were reported 26 cases and 9 deaths; no cases or deaths from smallpox, and 37 deaths from all causes. No fever has been found among the shipping or among the passengers leaving the port.

On account of the deficiency of the water supply in the city it becomes necessary for the inhabitants to accumulate water in barrels and cisterns and, in consequence, the number of breeding places for mosquitoes is beyond comprehension. It will be about two years before an adequate water supply will be furnished the city. The city and federal authorities have taken up the matter of oiling the water receptacles and where it has been done thoroughly the disease has disappeared.

Respectfully,

S. H. HODGSON,

Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

Report from Tampico—Typhus fever at San Luis Potosi—Mortality at Tampico.

TAMPICO, MEXICO, June 16, 1902.

SIR: Through the courtesy of the United States consular agent at San Luis Potosi, Mexico, I am enabled to report that from May 1, 1902, to June 13, 1902, there were reported to the board of health of that city 40 cases of typhus with 7 deaths.

Respectfully,

JOS. GOLDBERGER,

Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

TAMPICO, MEXICO, June 17, 1902.

SIR: I have the honor to transmit herewith abstract of bills of health issued at this port during the week ended June 14, 1902. During the same period there were recorded in the office of the Juez Civil a total of 8 deaths, as follows: Malaria, 2; tuberculosis, 3; traumatism, 1; mental disease, 1, and unknown cause, 1. Condition of the port continues good.

Respectfully,

JOS. GOLDBERGER,

Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

NICARAGUA.

Weekly reports of conditions and transactions at Bluefields—Fruit port.

BLUEFIELDS, NICARAGUA, June 15, 1902.

SIR: I have the honor to make the following report of the conditions and transactions at this port during the week ended June 14, 1902:

Present officially estimated population, 4,000. Number of cases and

deaths from yellow fever during the week, none; number of cases and deaths from smallpox during the week, none; number of cases and deaths from typhus fever during the week, none; number of cases and deaths from cholera during the week, none; number of cases and deaths from plague during the week, none; number of deaths from other causes during the week, 3. Prevailing diseases, malarial fever in a mild form. General sanitary condition of this port and the surrounding country during the week, very good.

Bill of health was issued to the following vessel: June 8, steamship *Ulstein*, crew, 15; passengers from this port, none; passengers in transit, none; baggage disinfected, none. June 13, steamship *Esther*, crew, 19; passengers from this port, 6; passengers in transit, none; baggage disinfected, 5 pieces; steamship *Banan*, crew, 20; passengers from this port, 1; passengers in transit, none; baggage disinfected, 1 piece.

Respectfully,

D. W. GOODMAN,

Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON GENERAL,

U. S. Marine-Hospital Service.

PHILIPPINE ISLANDS.

Investigation as to source of cholera infection at Manila.

MANILA, P. I., May 9, 1902.

SIR: In reply to your letter of the 1st ultimo, relative to the manner in which cholera was introduced into Manila, I have the honor to state that further investigations tend to confirm my report of March 30 that the disease was introduced by vegetables from Canton admitted prior to March 5, the date upon which these articles were prohibited. However, a vessel arrived from Hongkong on March 16 and was cleared on the 17th that had on board vegetables that Asst. Surg. J. W. Kerr had not certified. These were refused to be landed, and I have been unable to secure evidence that any of these were smuggled ashore. Another point against the latter being the source of infection is, that cholera appeared three days later and that the same vegetables eaten by those on board ship produced no sickness.

It has been impossible to ascertain definitely at what time the infection was introduced and what particular shipment of vegetables is responsible for starting the epidemic, since no history of value could be secured from the first cases relative to the source or nature of the food they had eaten.

I am now having investigations conducted through Filipino physicians in the San Nicolas district, the locality in which the disease made its appearance, in order to ascertain more definitely if any cases of cholera occurred before March 20 and relative to the food products and their source used at that time.

Respectfully,

J. C. PERRY,

Passed Assistant Surgeon, U. S. M. H. S.,

Chief Quarantine Officer for the Philippine Islands.

The SURGEON-GENERAL,

U. S. Marine Hospital Service.

Progress of the cholera epidemic in the Philippine Islands from March 27 to May 4, 1902.

MANILA, P. I., May 9, 1902.

SIR: I have the honor to report on the progress of the cholera epidemic in the Philippine Islands as follows, for the period from March

27 to May 4, 1902: During the week there has been little change in the situation, although a slight increase in the number of cases in Manila occurred. The spread of the infection is due to contaminated food, as the water supply remains free from infection. The disease in the provincial towns shows a more rapid increase and subsidence than in Manila, and at the date of writing shows a slight improvement. The data pertinent to the subject is transmitted herewith in tabulated form.

Respectfully,

J. C. PERRY,

*Passed Assistant Surgeon, U. S. M. H. S.,
Chief Quarantine Officer for the Philippine Islands.*

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

Progress of the cholera epidemic in the Philippine Islands during the week ended May 10, 1902.

MANILA, P. I., May 12, 1902.

SIR: I have the honor to submit herewith report of the progress of cholera in the Philippine Islands for the week ended May 10, 1902. There has not been much change in the situation, although the disease in the provinces shows some decrease, and during the week Tacloban, in the island of Leyte, in the south, has become infected. The latter place, if the disease becomes epidemic, will prove a dangerous center, on account of imperiling the numerous adjacent islands. I think the disease gained an entrance into this town from Nueva Caceres and not from Manila. This matter is now being investigated.

Respectfully,

J. C. PERRY,

Passed Assistant Surgeon, U. S. M. H. S.

Chief Quarantine Officer for the Philippine Islands.

The SURGEON-GENERAL,
U. S. Marine Hospital Service.

PORTO RICO.

Report of quarantine transactions at San Juan and subports.

SAN JUAN, P. R., June 6, 1902.

SIR: I have the honor to submit herewith the following report of the quarantine transactions at this and the 6 subports of the island of Porto Rico, for the month of May, 1902:

San Juan.—Vessels inspected, 27; bills of health issued, 94; vessels held in quarantine, 2; vessels disinfected, none; persons detained in quarantine, none; baggage disinfected, 2 pieces; mail disinfected, 5 packages; persons vaccinated, none.

The provisional flag steamship *Julia*, from Cuban and Dominican ports, arrived on her regular schedule upon the 19th instant. This ship had been disinfected as usual at Santiago de Cuba prior to clearing for Dominican and Porto Rican ports. Passengers for Porto Rico were permitted to land and the vessel given free pratique. One sack of mail from Santo Domingo was transferred to the island and disinfected.

There arrived also upon the 19th the Spanish steamship *Ciudad de Cadiz*, from Havana, Port Limon, Colon, Barranquilla, Puerto Cabello, La Guayra, and Ponce. This vessel was placed in quarantine under guard while here. Two pieces of baggage and 2 packages of mail from Colon were taken to the island and disinfected. Passengers for San Juan were permitted to land.

The French steamship *Olinde Rodriguez*, from Gonaives, Petit Goave,

Port au Prince, Saint Marc, Cape Haitien, and Sanchez entered upon the 20th instant; the vessel had touched at Saint Thomas. All bills of health were clean and passengers were allowed to land whose destination was Porto Rico. The ship was placed in quarantine under guard while at this port. One sack of mail was removed to the island and subjected to disinfection.

The Cuban (formerly the provisional flag) steamship *Maria Herrera* entered on her regular schedule on the 31st, having touched at Cuban and Dominican ports. She had undergone her usual disinfection at Santiago de Cuba. All bills of health presented by the vessel were clean, and passengers from Porto Rico were permitted to land and the steamer was granted free pratique. One sack of mail from Puerto Plata was disinfected at the island.

I inclose vital statistics of San Juan.

The following embraces a summary of the number of vessels inspected at the subports during the month: Mayaguez, 7; Arecibo, 4; Humacao, 5; Aguadilla, 1; Fajardo, 1; Arroyo, 3.

The following is a report of the mortality at the subports: Mayaguez, 107; Arecibo, 92; Humacao, 54; Aguadilla, 29; Fajardo, 39; Arroyo, 20.

Respectfully,

H. S. MATHEWSON,

Passed Assistant Surgeon, U. S. M. H. S.

Chief Quarantine Officer for Porto Rico.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

Reports from Ponce—End of smallpox.

PONCE, P. R., June 9, 1902.

SIR: Through the chief quarantine officer for Porto Rico, I have the honor to transmit herewith the quarantine and abstract of bills of health reports for the week ended June 7, 1902. Also the summary of transactions of this station and mortality report of the city for the month of May, 1902. During the week 2 vessels were inspected and passed and 5 bills of health were issued to outgoing vessels. The board of

health reports 1 new case of smallpox and 1 recovered, leaving 6 still under treatment.

Respectfully,

W. W. KING,
Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

PONCE, P. R., June 16, 1902.

SIR: Through the chief quarantine officer for Porto Rico, I have the honor to transmit herewith the quarantine and abstract of bills of health reports for the week ended June 14, 1902.

During the week 1 vessel was inspected and passed and 3 bills of health were issued.

The board of health reports that the last case was discharged from their smallpox hospital on the 9th instant and the place closed. In all, 74 cases were reported to me, though there have undoubtedly been many more unrecognized or concealed. Two of these cases were reported as smallpox and the others as varicella, though the official reports of the

board do not give the cases under either diagnosis. Possibly some cases were varicella, but I think by far the greater number have been true smallpox, though mostly mild cases.

Respectfully,

W. W. KING,

Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

Inspection of immigrants at San Juan for the week ended June 7, 1902.

SAN JUAN, P. R., June 9, 1902.

SIR: I submit herewith report of alien steerage passengers arriving at this port during the week ended June 7, 1902. June 3, French steamship *St. Simon*, from Havre, Bordeaux, and Saint Thomas, West Indies, with 5 immigrants. June 4, American steamship *Philadelphia*, from Puerto Cabello, Curaçao, and La Guayra, with 3 immigrants. Total, 8.

Respectfully,

H. S. MATHEWSON,

Passed Assistant Surgeon, U. S. M. H. S.

Chief Quarantine Officer for Porto Rico.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

Inspection of immigrants at Ponce for the week ended June 7, 1902.

PONCE, P. R., June 9, 1902.

SIR: Through the chief quarantine officer for Porto Rico, I submit herewith report of alien steerage passengers arriving at this port during the week ended June 7, 1902. June 1, Spanish steamship *Berenguer el Grande*, from Barcelona, Torrevieja, Valencia, Cadiz, Canary Islands, San Juan, and Mayaguez, with 1 immigrant. June 3, French steamship *St. Domingue*, from Fort de France, Pointe à Pitre, Bassell, and Saint Thomas, with 16 immigrants. Total, 17.

Respectfully,

W. W. KING,

Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

Foreign and insular statistical reports of countries and cities—Yearly and monthly.

AFRICA—*Sierra Leone*.—Three weeks ended May 23, 1902. Estimated population, 40,000. Total number of deaths, 55. No contagious diseases reported.

ARGENTINA—*Buenos Ayres*.—Month of March, 1902. Estimated population, 800,000. Total number of deaths, 1,045, including diphtheria, 16; enteric fever, 26; measles, 5; scarlet fever, 12; smallpox, 18, and 150 from tuberculosis.

BAHAMAS—*Dunmore Town*.—Two weeks ended June 6, 1902. Estimated population, 1,232. One death. No contagious diseases.

Green Turtle Cay—Abaco.—Two weeks ended June 4, 1902. Estimated population, 3,314. No deaths and no contagious diseases.

Nassau.—Two weeks ended June 7, 1902. Estimated population,

12,535. Number of deaths not reported. No contagious diseases reported.

CANADA—*British Columbia—Vancouver*.—Month of May, 1902. Estimated population, 28,000. Total number of deaths not reported. Two deaths from scarlet fever reported.

Victoria.—Month of May, 1902. Estimated population, 21,000. Total number of deaths, 31, including diphtheria, 1, and 4 from tuberculosis.

CHINA—*Amoy*.—Two weeks ending May 10, 1902. Estimated population, 250,000. Total number of deaths not reported. Cholera and plague present in sporadic form.

FRANCE—*Roubaix*.—Month of May, 1902. Estimated population, 124,660. Total number of deaths, 206, including diphtheria, 2; measles, 12, and 3 from whooping cough.

GREAT BRITAIN—*England and Wales*.—The deaths registered in 76 great towns in England and Wales during the week ended May 31, 1902, correspond to an annual rate of 16.5 per 1,000 of the aggregate population, which is estimated at 14,862,909.

Bradford.—Two weeks ended May 31, 1902. Estimated population, 281,770. Total number of deaths, 189, including diphtheria, 3; enteric fever, 1; measles, 19; scarlet fever, 3; whooping cough, 2, and 10 from tuberculosis.

London.—One thousand four hundred and fifty-four deaths were registered during the week, including measles, 65; scarlet fever, 13; diphtheria, 14; whooping cough, 41; enteric fever, 6; smallpox, 48, and diarrhea and dysentery, 10. The deaths from all causes correspond to an annual rate of 16.6 per 1,000. In Greater London 1,923 deaths were registered. In the "outer ring" the deaths included 1 from diphtheria, 19 from measles, 1 from scarlet fever, 14 from smallpox, and 1 from whooping cough.

Ireland.—The average annual death rate represented by the deaths registered during the week ended May 31, 1902, in the 21 principal town districts of Ireland was 19.4 per 1,000 of the population, which is estimated at 1,092,322. The lowest rate was recorded in Drogheda, viz, 4.1, and the highest in Wexford, viz, 28.0 per 1,000. In Dublin and suburbs 165 deaths were registered, including diphtheria, 2; enteric fever, 1; measles, 2; scarlet fever, 1; whooping cough, 1, and 34 from tuberculosis.

Scotland.—The deaths registered in 8 principal towns during the week ended May 31, 1902, correspond to an annual rate of 19.3 per 1,000 of the population, which is estimated at 1,679,923. The lowest mortality was recorded in Leith, viz, 15.2, and the highest in Perth, viz, 25.0 per 1,000. The aggregate number of deaths registered from all causes was 624, including diphtheria, 4; measles, 13; scarlet fever, 1, and 22 from whooping cough.

JAPAN—*Nagasaki*.—Ten days ended May 20, 1902. Estimated popu-

lation, 131,000. Total number of deaths not reported. One death from enteric fever and 1 from plague reported.

JAVA—*Batavia*.—Two weeks ended May 4, 1902. Estimated population, 150,000. Number of deaths not reported. No contagious diseases.

SPAIN—*Barcelona*.—Two weeks ended June 3, 1902. Estimated population, 672,000. Total number of deaths not reported. Five deaths from enteric fever and 2 from smallpox reported.

Corunna.—Month of May, 1902. Estimated population, 44,000. Total number of deaths, 101, including enteric fever, 2, and 26 from tuberculosis.

Valencia.—Two weeks ended May 31, 1902. Estimated population, 204,000. Total number of deaths not reported. Four deaths from enteric fever and 5 from smallpox reported.

Vigo.—Month of May, 1902. Estimated population, 22,000. Total number of deaths, 43, including 1 from typhus fever.

Cholera, yellow fever, plague, and smallpox, December 27, 1901, to June 27, 1902.

Reports received by the Surgeon-General United States Marine-Hospital Service from United States consuls through the Department of State and other sources.]

For reports received from June 29, 1901, to December 27, 1901, see PUBLIC HEALTH REPORTS for December 27, 1901.]
